

Test Management

CAPABILITY STATEMENT

Are you confident your projects are delivering quality solutions into your business?

It's a sobering thought, but a recent survey suggests that 35% of software projects fail due to poor or inadequate testing, test management and lack of leadership. Resolving issues or defects in the later stages of a project can have significant cost impacts.

When businesses introduce new solutions to improve efficiencies, streamline processes or improve the bottom line, it's important to ensure that the right test approach and supporting environment exists to substantiate the quality of the solution before it's deployed.

It's not just about testing to make sure that everything is working correctly; it's about testing what happens when things fail along the way and having contingency plans in place to minimise business impact. Understanding your business and creating an appropriate test environment with a strong assurance framework can ensure the quality and sustainability of solutions being deployed into your business are set up for success from the outset.

Services

Quay's specialist Test Consultants work with you to strategise, scope and deliver fit-for-purpose testing solutions that ensure the only the quality levels you require are deployed. Our specialist test consultants are equipped to create or review your testing approach, environment and deliverables to ensure they are appropriate including:

- Identify testing procedures and processes that require attention
- Understand non production environment limitations and manage the gap with the right quality gates.
- Implement a prioritisation to testing
- Implement a risk based testing approach where different project factors are used as levers to deliver projects on time without compromising quality
- Not only help drive testing consistency and repeatability within a project but also across the whole organisation.

End-to-end application testing solution

The Quay Test Practice provides skilled resources and capabilities needed to develop the right test strategy, the right processes and the right testing tools.

Our Test Management Practice not only provides easy to use testing tools, templates and matrices but also brings along a proactive, pragmatic and continuous improvement attitude and experience to the client.

Application testing health check and strategy

As an integral part of the Quay Assurance Practice, test consultants review the current testing state of an organisation and identify opportunities to enhance end-to-end testing processes and quality based on the organisation's testing maturity levels.

A right test strategy and total quality assurance plan developed by Quay test consultants can provide tangible benefits to our clients, such as:

- Reducing the total cost of testing
- Enhancing the software quality level
- Reducing the time to market
- Pre-developing simple and easy testing tools for client to use

Quay's Quality Assurance approach facilitates success by ensuring that firm testing policies, protocols, quality gates and debugging goals are established to support successful delivery of testing phases of projects within defined budget and quality.

About Quay

Michael Bolton and Rod Adams established Quay Consulting in 2006 with the firm belief in

the power of positive change and a desire to deliver better project outcomes.

Over the past decade, we've built a team of high-performing project professionals who offer a wealth of experience and consulting expertise along with a commitment to high levels of care and quality assurance. Our consultants bring a high-level consulting and collaborative approach to delivering change via tailored knowledge, professional project management and delivery, peer-to-peer collaboration, and capability uplift in each client engagement.

Quay is deeply committed to sharing the knowledge we've gleaned from years of project delivery experience – both the successes and the failures – whether it's sharing insights via our monthly Quay Bulletin, in facilitated roundtable discussions with project peers or in lifting the capability of our clients' teams in day-to-day knowledge transfer.

Quay Consulting is part of the **CPM Group**.
